Bulletin Boards

25X1A9a

Dear Mr. [REDACTED]:

STATSPEC

We have received an office memorandum, dated 3 November 1953, from the Chief Engineer, [REDACTED] to Chief, Real Estate and Construction Division, relative to installing thirteen bulletin boards in the Operations Building. It seems that these bulletin boards were inadvertently omitted from the Contract Drawings and are now considered necessary for operational functions.

Therefore, it is requested that you ask the Contractor to submit a proposal for furnishing and installing thirteen bulletin boards as located and detailed on attached prints of Drawings Nos. 3-1 and C-4.

STATSPEC

The details follow your suggestions generally, as stated in [REDACTED]'s memorandum to the Chief Engineer, [REDACTED] dated 29 October 1953. However, it is believed that by adjusting size of bulletin boards to fit tile sizes, it will eliminate tile cutting and present a more pleasing effect.

Very truly yours,

25X1A9a
